

## **Devizes Running Club Championships 2012**

For 2012 the club championships will take on a slightly different format. With the launch of the Wiltshire Road Race League it has been decided that there will be three categories.

### **The Road Race Championship**

This will comprise all the races of the Wiltshire Road Race League (with the exception of the Devizes 10k). Results will again be calculated using the WAVA age grading calculator and members best 5 results will comprise their final score.

### **The Multi-Terrain Championships**

For those who prefer mud to tarmac. This will comprise best results from selected multi-terrain races across the year. Again the age grading will be used to calculate positions and the best 5 results will be used to determine the winner.

### **The Half Marathon Challenge**

Simply your best age graded Half Marathon of the year. This can be on any certified road course on any date in 2012.

### **General Notes**

In the event of a tie in the road championships the winner will be the athlete with the best individual age graded percentage in one of the qualifying events. In the (very unlikely) event of this still being a tie, the second best results will be assessed and so on until a winner is found.

A tie in the multi-terrain championships will stand as the final result (percentages are not comparable for different races and as such it would be unfair to award the trophy on the basis on one result).

Athletes completing Half Marathons should notify the Championship organiser if the race is not one usually listed in club results.

In all cases results will stand for paid up first claim club members who have entered the event as a DRC runner.
